## Professional Headline

**Motivated and detail-oriented Junior Software Engineer with 8 months of hands-on experience in developing modern web applications using Angular**. Skilled in **Angular, TypeScript, HTML, CSS, TypeScript, JavaScript and Bootstrap**, with a strong grasp of modern UI/UX principles and component-driven architecture. Proficient in integrating **RESTful APIs**, implementing **reactive forms**, and managing application state efficiently using **RxJS**. Adept at writing clean, maintainable, and scalable code while collaborating effectively with cross-functional teams in agile environments. Committed to delivering high-performance front-end solutions and continuously enhancing skills through emerging web technologies and best development practices.

## EDUCATION

### ICS COMPUTER SCIENCE

Govt Collage Sabzazar Lahore                                                                                        **Lahore, PAKISTAN**

**BSCS in Virtual University Pakistan (Remote)**

*Complete 1$^{st}$ Semester*

## EXPERIENCE

### Angular Developer at Bin Yousaf Solutions, Lahore, Pakistan | May 2025 – Present

- Developed dynamic and responsive single-page applications using Angular
- Designed and implemented models, database schema, and repositories using Entity Framework Core. • Created reusable Angular components and implemented routing and lazy loading.
- Used Chart.js, Highcharts, and ECharts for visualizing analytical data.
- Applied Angular Material UI for consistent and responsive UI design.
- Consumed backend services using HttpClientModule and implemented error handling.
- Wrote clean and maintainable code with a focus on performance and scalability.

## Projects:

- **Bin Yousaf** – A company profile website highlighting services and contact details  .
- **My Clinical Trial (MCT2)** : Web application, focusing on building responsive front-end interfaces and integrating dynamic data using Angular and RESTful APIs.
- **Personal Portfolio** – A clean, responsive portfolio to showcase development skills and projects .

- **GRC (Golden Ratio Construction)** – A professional construction company static website

- **Poultry Farm Management System** to streamline flock tracking, inventory management, and daily operations using Angular and RESTful API integration.
- Developed interactive dashboards featuring dynamic API integrations, user authentication (Login & Signup), and responsive forms with robust validation mechanisms.

---

## Frontend & UI Development :

- Angular, TypeScript, HTML5, CSS3 , Bootstrap
- RESTful API Integration
- Reactive Forms , Invoice
- Dashboard
- Highcharts, Apache ECharts, ngx-charts
- Angular Material UI
- Technical Documentation & Code Reviews

## Tools & Technologies:

- Visual Studio Code, Git , GitHub
- Chrome DevTools, Postman
- Responsive Design, Component-Based
- Architecture   Soft Skills:
- Strong Analytical & Problem-Solving Skills
- Team Collaboration
- Time Management
- Eagerness to Learn
